

**Vibration Control Technologies, LLC** (VCT) one of North America's largest suppliers of torsional vibration dampers (TVD), offers Noise, Vibration and Harshness (NVH) solutions that help automobile manufacturers improve the performance, reliability and comfort of their vehicles. NVH is one of the most complex sectors of automotive development and VCT is dedicated to providing world-class solutions globally. Leveraging our broad foundation of technologies, we partner with our customers to meet their NVH challenges.

### **VCT Mission Statement**

The mission of Vibration Control Technologies, LLC is to be the premier supplier of vibration control products for the automotive & heavy-truck industries by surpassing customer expectations for quality and total cost. We will attain customer satisfaction through value differentiated design and through continuous financial enhancement initiatives in manufacturing and customer service. This is achieved through the talents and energy of our employees and suppliers, engaged in improvement activities such as Kaizen, Six Sigma, and other team oriented improvement methods - all with the goal to achieve continuous growth in the business.
